Diversified Portfolio Statement

Sample account statement | Statement period: January 1-31, 2025

SAMPLE / SYNTHETIC DATA - created for FinPilot AI development, Snowflake testing, and Document RAG evaluation.

Account Summary

Account Type	Individual Investment Account	**Statement Date**	January 31, 2025
Beginning Value	$13,400.00	**Ending Value**	$13,891.00
Net Deposits	$250.00	**Dividends / Income**	$34.00
Account Fees	($7.00)	**Investment Change**	$214.00

Portfolio Snapshot

Total Market Value	Total Cost Basis	Unrealized Gain/Loss	Return on Cost
$13,891.00	$13,060.00	+$831.00	+6.4%

Holdings Summary

Security	Ticker	Qty	Avg. Cost	End Price	Cost Basis	Market Value	Unrealized G/L
Apple	AAPL	12	$180.00	$195.00	$2,160.00	$2,340.00	+$180.00
Microsoft	MSFT	8	$390.00	$410.00	$3,120.00	$3,280.00	+$160.00
NVIDIA	NVDA	10	$120.00	$135.00	$1,200.00	$1,350.00	+$150.00
Tesla	TSLA	6	$230.00	$245.00	$1,380.00	$1,470.00	+$90.00
Berkshire Hathaway B	BRK.B	5	$370.00	$395.00	$1,850.00	$1,975.00	+$125.00
BlackRock	BLK	2	$760.00	$790.00	$1,520.00	$1,580.00	+$60.00
JPMorgan Chase	JPM	10	$170.00	$178.00	$1,700.00	$1,780.00	+$80.00
AMC Entertainment	AMC	20	$6.50	$5.80	$130.00	$116.00	$-14.00
TOTAL					**$13,060.00**	**$13,891.00**	**+$831.00**

Portfolio Allocation & Activity

Allocation is based on ending market value for this synthetic statement period.

Security	Ticker	Market Value	Portfolio Weight
Microsoft	MSFT	$3,280.00	23.6%
Apple	AAPL	$2,340.00	16.8%
Berkshire Hathaway B	BRK.B	$1,975.00	14.2%
JPMorgan Chase	JPM	$1,780.00	12.8%
BlackRock	BLK	$1,580.00	11.4%
Tesla	TSLA	$1,470.00	10.6%
NVIDIA	NVDA	$1,350.00	9.7%
AMC Entertainment	AMC	$116.00	0.8%

Sample Account Activity

Date	Activity	Security	Quantity	Amount
Jan 03, 2025	Buy	Apple (AAPL)	2	$390.00
Jan 10, 2025	Dividend	JPMorgan Chase (JPM)	-	$12.00
Jan 17, 2025	Dividend	BlackRock (BLK)	-	$22.00
Jan 22, 2025	Deposit	Cash	-	$250.00
Jan 28, 2025	Account Fee	Account servicing	-	($7.00)

Performance Notes

• **Largest position:** Microsoft represents the largest ending market value in this sample portfolio.

• **Technology concentration:** Apple, Microsoft, NVIDIA, and Tesla together represent a significant share of the portfolio.

• **Positive unrealized result:** Seven of eight sample positions show an unrealized gain at period end; AMC Entertainment shows a small unrealized loss.

• **Historical analysis:** FinPilot AI can compare the holdings in this document with monthly historical price data stored in Snowflake.

Risk Disclosures & RAG Test Material

This page intentionally contains narrative text so the document can be used to evaluate semantic retrieval.

How FinPilot AI Uses This Document

Document RAG Agent: extracts text, splits it into chunks, creates embeddings, and retrieves the most relevant sections for a user question. **Investment Agent:** uses structured historical market data from Snowflake for calculations and comparisons. **Insight & Risk Agent:** combines document evidence with structured portfolio analytics to generate a grounded explanation.

Portfolio Concentration Risk

The sample portfolio has meaningful exposure to technology and growth-oriented securities, including Apple, Microsoft, NVIDIA, and Tesla. Concentrated exposure may increase sensitivity to sector-specific events, valuation changes, product cycles, interest-rate expectations, and market volatility.

Market Volatility Risk

Equity securities can fluctuate substantially in value. Higher-volatility holdings such as Tesla, NVIDIA, and AMC Entertainment may experience larger percentage changes over short periods. Historical performance does not guarantee future results.

Financial Sector Exposure

The portfolio includes Berkshire Hathaway B, BlackRock, and JPMorgan Chase. Financial-sector holdings may be affected by interest rates, credit conditions, asset valuations, regulation, capital-market activity, and broader economic conditions.

Income and Fees

The sample statement records $34.00 of dividend income during the period and a $7.00 account servicing fee. Dividend amounts and fees shown here are synthetic and exist solely for demonstration and retrieval testing.

Data Interpretation

Cost basis represents the synthetic acquisition value used in this statement. Market value is calculated as quantity multiplied by the synthetic month-end price. Unrealized gain or loss is the difference between market value and cost basis and does not represent a realized taxable result.

Suggested RAG Evaluation Questions

- What is the ending value of the portfolio?
- Which security shows an unrealized loss?
- What account fee was charged?
- Which holdings are described as higher-volatility?
- Which holding has the largest market value?
- How much dividend income was recorded?
- What concentration risk is mentioned?
- How is unrealized gain or loss defined?

Important: This document is entirely synthetic. Company names and ticker symbols are used only to align with FinPilot AI historical market datasets. Prices, quantities, activity, dividends, fees, and account values are sample values and are not sourced from a brokerage account or guaranteed to match real market prices for the stated period.
